

TREE CITY USA

The Town of Summerville has been designated as a Tree City USA since 1981. The Tree City USA program is sponsored by the Arbor Day Foundation in cooperation with the National Association of State Foresters and the USDA Forest Service. Summerville has met the four standards to become a Tree City USA community: having a tree board or department, a tree care ordinance, a comprehensive community forestry program, and an Arbor Day observance and proclamation.

Tree Ordinance and Tree Permits

The Town of Summerville's **Tree Protection Ordinance** is in place because the citizens of the town and

Town Council recognize the importance of preserving the natural landscape through the protection of existing trees. Trees provide a number of benefits including:

- Promote the public health, safety and general welfare
- Lessen air pollution
- Increase dust filtration
- Reduce noise and heat (minimize heating and cooling costs)
- Prevent soil erosion
- Improve surface drainage and minimize flooding
- Ensure that noise, glare and other distractions of movement in one area do not adversely affect activity within adjacent areas
- Beautify and enhance improved and undeveloped land
- Minimize the cost of construction and maintenance of drainage systems necessitated by the increased flow and diversion of surface waters.

Based on the above reasons, the intent of the Tree Protection Ordinance is to encourage the protection and replacement of trees consistent with the economic and healthful enjoyment of private property. The intent is not punitive, or to cause hardship to any individual, private firm or public agency which uses every care and diligence to protect trees within the town.

When do I need a tree removal permit?

For properties in the Town limits that are already developed and/or not requiring a building permit, a tree removal permit is

required when the property owner desires to remove any tree(s) of six inches or greater diameter-at-breast-height (DBH). DBH is the standard measure of tree size and is a tree trunk diameter in inches at a height of 4 1/2 feet above the ground.

For properties that are proposing to remove any trees of six inches or greater DBH due to building or other construction, a site plan showing the proposed footprint of the building, swimming pool, etc. and the tree(s) to be removed needs to be submitted. If a permit is required for the construction, the tree removal permit will not be approved until the corresponding building permit is approved.

Where and how do I apply?

The property owner will apply for a tree removal permit at Town Hall (200 S. Main St.) by filling out a tree removal application and paying a permit fee of \$5. A separate permit application does not need to be filled out for each individual tree. Applications are also available online:

www.summervillesc.gov, click on Forms and Applications. When you apply you will be given ribbon with which to mark the tree(s).

Who looks at the tree(s) and how long will it take to get my permit approval?

The Town's Planning Department reviews all tree removal permits that are submitted.

Typically, they are reviewed within a couple of days to a week from when they are submitted. You should receive a call when your tree removal permit is approved. If the tree is larger than 16 inches DBH, then the Tree Advisory Protection (TAP) Committee must review the application. The TAP Committee goes out monthly, and you will be given at least 24 hours notice before they will be going out to review trees. If removal is not necessitated by death, disease, or damage of the tree (not caused by the property owner) then the tree will have to be mitigated at 50% for protected trees and 100% for grand trees.

How do I pick up my permit and when does it expire?

The Town requires that the tree service you are hiring to remove the tree(s) come to Town Hall and pick up the tree removal permit. This is to ensure that they are a valid company that holds a business license with the Town. If the property owner will be removing the tree(s), the property owner can come to Town Hall to pick up the tree removal permit. The permit is valid for six months, but an extension can be requested if done before the permit expires.

On what basis are tree(s) reviewed?

Trees are typically approved for removal if they meet one or more of the following criteria: diseased, dead, or dying; pose a safety hazard to nearby buildings (within 10 feet), utility lines or pedestrian or vehicular traffic; prevent essential grade or all reasonable utility installations; prevent all reasonable site configurations; removal of trees is the only reasonable means by which building, zoning, subdivision, health, public safety, or other Town requirements can be met; are located in the building footprint and up to ten feet around the perimeter of the construction site of an approved building and related driveway parking area when every measure has been explored to preserve existing trees has failed; the lot is of such density with existing trees that the removal of certain protected trees is considered beneficial.

Can a tree removal denial be appealed?

If the tree removal permit is denied by the Planning Department, then it can be appealed to the entire TAP Committee. Any applicant aggrieved by a decision of the entire TAP Committee has the right to appeal the board's decision before the courts of the State of South Carolina as provided in S.C. Code, § 6-29-900. Applicants can also reapply for tree removal at a later date.
